FOXEDGE

MLB HISTORICAL RESEARCH LIBRARY

CONTROLLED FREE SAMPLE

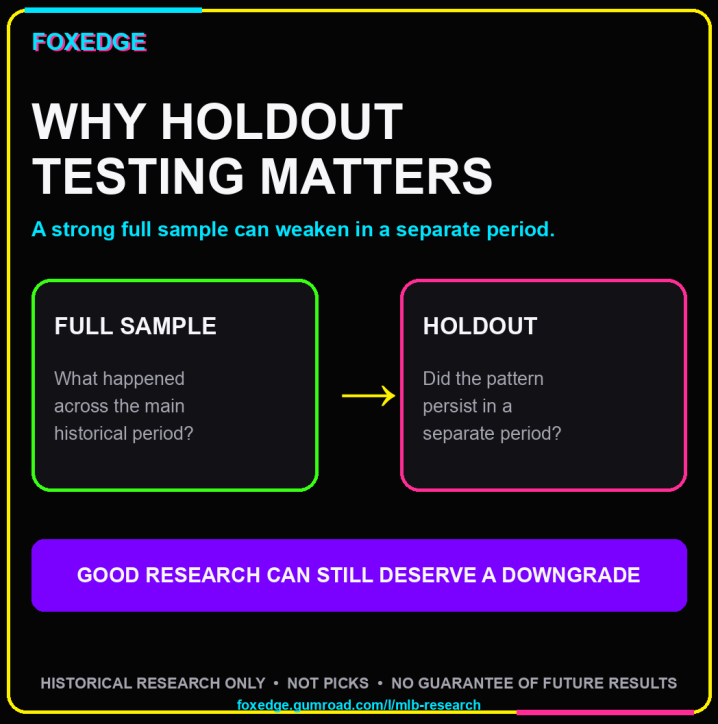

A source-verified look at the methodology, evidence grades, representative validated and rejected findings, database structure, and quick-reference workflow inside the full $79 library.

Research preview only. Not a picks service, prediction model, or automatic betting system.

METHOD AND EVIDENCE

Why the full sample and recent test stay separate

- 13,661 completed MLB games and 27,322 team-side opportunities from 2021 through July 12, 2026.
- Closing prices for the validated outcome work, using flat one-unit returns.
- A 2021-2026 partial full sample kept separate from the supplied 2025-2026 calendar test split.
- 90 documented situations: 6 B-grade monitors, 2 downgraded cautions, 3 rejected findings, and 79 research-only screens.
- Season stability, bootstrap intervals, recent-test fields, context warnings, row locators, and field-level source hashes where supplied.

LABEL	MEANING	USE
B	Positive supplied recent test	Historical monitor; current price and context still control
D	Negative supplied recent test	Downgraded caution
Reject	Supplied report-card rejection	Historical warning; never a recommendation
Research Only	No supplied report-card holdout	Narrative check and exploration only

REPRESENTATIVE FINDINGS

One validated monitor and one downgrade

May dogs +120 to +129

EVIDENCE	RESULT
Full sample	327 qualifying bets, 165-162, +41.30 units, +12.63% ROI, positive in 6 of 6 represented seasons
2025-2026 test	107 bets, +10.81 units, +10.10% ROI
Grade	B - validated watch
Context gate	Do not use the month label alone. The current price, lineup, starter, bullpen, and market context still have to match.

Source: source_inputs/full_validation/34_angle_report_cards.csv | angle=May dogs +120 to +129

Detroit under 50% public

EVIDENCE	RESULT
Full sample	459 qualifying bets, 214-245, +52.76 units, +11.49% ROI
2025-2026 test	48 bets, -6.97 units, -14.53% ROI
Grade	D - caution; the recent test failed
Data warning	Public-side availability is incomplete in 2024-2026 and is source-coverage sensitive.

Source: source_inputs/full_validation/34_angle_report_cards.csv | angle=Detroit under 50% public

The positive-looking full sample is not promoted after the later supplied test weakened. That separation is part of the product.

REJECTION AND DATABASE STRUCTURE

Failed assumptions stay visible

Colorado road moneyline

EVIDENCE	RESULT
Full sample	448 qualifying bets, 129-319, -96.23 units, -21.48% ROI, positive in 0 of 6 represented seasons
2025-2026 test	132 bets, -32.80 units, -24.85% ROI
Grade	Reject - historical warning

Source: source_inputs/full_validation/34_angle_report_cards.csv | angle=Colorado road moneyline

Database row example

FIELD	EXAMPLE
ID / situation	FE-MLB-003 / Favorites -120 to -139 under 50% public
Role / grade	Validated watch / B
Full sample	752 bets, +38.91 units, +5.17% ROI
Recent test	181 bets, +10.44 units, +5.77% ROI
Also included	Profitable seasons, bootstrap interval, stability note, live-context check, public-data warning, source locator, and source hashes

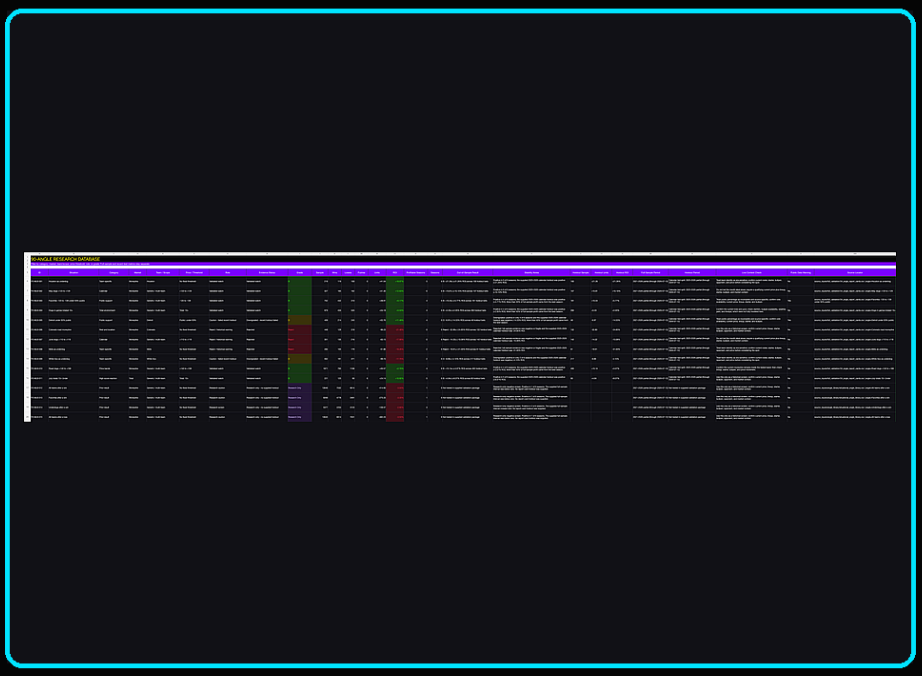

DATABASE PREVIEW

A searchable structure for evidence, warnings, and source traceability

FOXEDGE

SEARCHABLE RESEARCH DATABASE

90 historical rows • evidence grades • samples • seasons • holdout fields

HISTORICAL RESEARCH ONLY • NOT PICKS • NO GUARANTEE OF FUTURE RESULTS

foxedge.gumroad.com/l/mlb-research

The paid workbook contains nine sheets, including the 90-row angle table, validated detail, watchlist, cautions and fades, research-only screens, season results, definitions, and a field-level source manifest.

QUICK-REFERENCE EXAMPLE

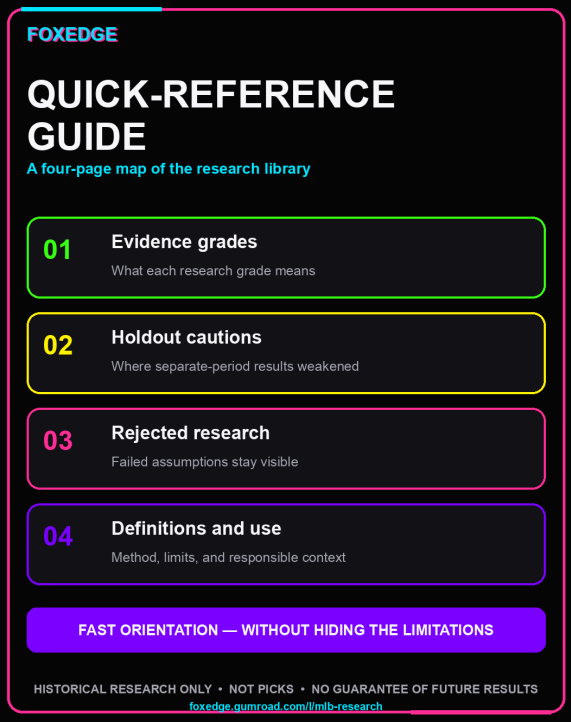

Fast orientation without hiding the limitations

July totals 10+ Under

GRADE	FULL SAMPLE	RECENT TEST	STABILITY
B	221 bets, +24.14 units, +10.92% ROI	60 bets, +4.84 units, +8.07% ROI	Positive in 5 of 6 represented seasons

The four-page guide ends with a live-board gate:

- Condition: exact price, side, total, and situation still match.
- Personnel: starter, expected lineup, bullpen availability, and opponent state are confirmed.
- Environment: weather, park, roof, and game-status risk are checked for totals.
- Market: juice, break-even threshold, late moves, and source coverage are checked.
- Evidence: B, D, Reject, and Research Only labels remain controlling.
- Decision: reject the spot when price or context no longer matches the research.

WHAT THE FULL $79 LIBRARY CONTAINS

Research work already organized

• A 51-page searchable playbook with all 90 situation cards, grade definitions, category sections, evidence notes, live-board checks, and source row locators.

• A 9-sheet Excel database with the 90-row angle table, watchlist, cautions and fades, research-only screens, validated detail, season results, definitions, and field-level source manifest.

• A four-page quick-reference PDF covering grades, holdout cautions, rejected research, narrative checks, definitions, and the live-board gate.

• A start-here guide and usage instructions.

IMPORTANT LIMITS

• 2026 is partial through July 12.

• Closing prices only for validated outcome work; no validated opener, closing-line-value, or sportsbook-robustness claim.

• Starting-pitcher fields are empty. Bullpen, weather, umpire, handle, travel-distance, and reliable public-vote timestamp fields were unavailable for the supplied historical work.

• Public-side coverage falls materially in 2024-2026.

• Historical grades do not authorize a wager or predict a future result.
